## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of species I including claims 1-4 in Paper filed 2/12/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 5-35 are withdrawn from further consideration, the Election/Restrictions requirement is thus made FINAL.

Applicant is reminded to cancel the non-elected claims 5-35.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirst (5,789,723).

Regarding claim 1, Hirst discloses a device comprising (Figure 12) (a) a diode; (b) a resistor in series with a switch ( $M_2$ ), with the resistor coupled to a termination of the diode; (c) an RC filter in parallel with the resistor and switch of element (b).

Regarding claim 2, Hirst discloses the switch ( $M_2$ ) is synchronized with an incoming peak current signal (PWM).

Art Unit: 2858

Regarding claim 3, Hirst discloses an average current signal (See also figure 10; figure 13; column 13, lines 35-39) is sensed across a capacitor (Current is sensed through the shunting resistor paralleling with capacitor on the right hand side of M<sub>2</sub>).

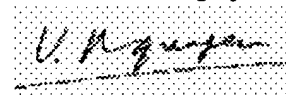

Regarding claim 4, Hirst discloses the RC filter (Capacitor and resistor parallels in the right hand side of the resistor and switch M<sub>2</sub>) smoothes an average current signal (The smoothing current signal is true not only for the prior art of Hirst but also true for every prior art having filter).
